

Leak Detector SPRAY

Allens Leak Detector Spray is specially formulated for the rapid detection of gas leaks. Easily applied and fluorescent for high visibility, it is non-corrosive to all types of pipe media.

PRODUCT INFORMATION

- **Contains a blend of high foaming surfactants**
Ensures effective detection of gas leaks by readily forming bubbles at the area of leak
- **Incorporates a non aggressive complex detergent formulation**
Suitable for use on all surface types including soft metals and plastics
- **A readily biodegradable mild formula with neutral pH**
Safe to use
- **Fluorescent yellow coloured mobile liquid**
Easy application with high visibility in poor light areas
- **Pack incorporates a directional spray nozzle**
Fluid can be applied exactly where required especially in hard to access areas
- **Suitable for all leak detection operations**
Excess Leak Detector fluid can easily and safely be washed away
- **Conforms to BS EN 14291:2004**
(Foam producing solutions for leak detection on gas installations)

DIRECTIONS FOR USE

Allens Leak Detector Spray is easily applied by spraying the area to be tested directly. Any leak is quickly identified by the generation of a foam at the site of the leak. When the repair has been effected, remove excess Leak Detector with water.

Store in original container in a cool place.

SPECIFICATION

Appearance:	Non viscous liquid
Colour:	Fluorescent yellow
Odour:	Slight detergent
pH:	6.5-7.5
Specific Gravity @20°C:	1.01 ± 0.01

SIZES AVAILABLE

Available in two convenient pack sizes: 250ml and 500ml clear recyclable HDPE containers.
