

ConnectaPipe

EasyJoint Eco

A complex blend of natural oil technologies that provide excellent lubricity properties under high loads and extreme water environments making it ideal for jointing heavy-duty pipes.

CONTAINS:

Saponified Castor Oil

Product Information

- Typically used with clay, concrete and plastic pipe material for waste water installations.
- Cold water wash off resistant with excellent lubricity properties for heavy duty pipes.
- Compatible with all known seal materials such as EPDM, SBR, NBR, NR, CR with no 'seal swell'
- Enhanced lubricity
- Unique design allows it be washed off with hot water from brushes and clothes etc
- Non-toxic

TECHNICAL DATASHEET

sizes available

1Kg and 2.5Kg

specification

Appearance:	Brown viscous gel
Odour:	No odour
pH:	7.0 Typical
Specific Gravity @20°C:	10 - 11

Directions for Use

Ensure that the pipe or fitting ends are clean and free from dirt

Apply a thin film of lubricant evenly to pipe end (especially the chamfer), gasket and inside the socket

Push pipe end into socket until pipe insertion mark indicates the pipe has been jointed to the correct socket depth

Storage: Store in original packaging in a cool, dry and well-ventilated area out of direct sunlight.
